Please note:

The indicated growth reflects changes in unit value and reinvestment of all distributions and does not take into account management fees payable by the unit holder which would reduce returns. Performance data is provided for illustrative purposes only and represents past performance, which is not necessarily indicative of future performance. Rates and conditions are subject to change without notice. The historical performance shown is that of the Canada Life segregated funds. For periods prior to the inception of the Canada Life segregated funds, the performance of the underlying third party funds were used. For information, call HUB International Limited - (519) 258-5948.

Your investments are important, and we're here to help you in every way we can.

Fund review - Investment Funds Available in This Plan

Gross Annualized rates of return (%) for the period ending:

March 31, 2025

1 yr 3 yr 5 yr 10 yr

* Denotes the default investment.
** Current 5 year rate of return. The rate is guaranteed by the financial institution that is providing the fund. The rate will not change over the term, even if the new rates are changing. You will be "locked-in" at that rate and can only reinvest when the term is up or pay a penalty to disinvest.
*** The lowest published 5 year CIA rate has been used. Some Plan Sponsors have rate enhancements which are not shown on the "Fund Review."

Investment management style

Each LifePath® strategy is a diversified portfolio, tailored to the investment time horizon of the investor. The name of each strategy represents the year when the investor will most likely begin to draw interest and/or principal out of their investment portfolio. The Fund employs an investment model that analyzes asset class data including risk, correlations and expected returns, and provides portfolio recommendations amongst broad asset classes. The allocations are constantly monitored and rebalanced quarterly in an effort to maximize expected return for a given level of risk.

Fund objective

This Fund seeks to provide investors with a single customized fund that is broadly diversified among Canadian bonds, Canadian equities, foreign equities and Canadian commercial and industrial real estate. This LifePath® Retirement Date Fund is appropriate for investors that have reached their retirement age.

Historical performance as at March 31, 2025

This graph shows a \$10,000 investment in this fund, on March 16, 2015 would be worth \$15,509 on March 16, 2025; compared to the benchmark which would be worth \$15,561 over that time period. Investment management style

Each LifePath® strategy is a diversified portfolio, tailored to the investment time horizon of the investor. The name of each strategy represents the year when the investor will most likely begin to draw interest and/or principal out of their investment portfolio. The Fund employs an investment model that analyzes asset class data including risk, correlations and expected returns, and provides portfolio recommendations amongst broad asset classes. The allocations are constantly monitored and rebalanced quarterly in an effort to maximize expected return for a given level of risk.

Fund objective

To provide investors with a single fund that's broadly diversified among Canadian and global stocks, bonds and alternative investments. The Fund automatically evolves to a more conservative asset mix over time to match the investor's investment time horizon.

Investment manager

Canada Life

Investment management style

Portfolio Solutions Group builds and monitors asset allocation funds. Their objective is to maximize returns while minimizing risks. To achieve this they combine top-down modelling and bottom-up manager selection. Their top-down analysis provides insight into aggregate portfolio style drift, risk exposure and mandate gaps. Their bottom-up focus is on selecting managers who consistently add value by following a well-defined investment process.

Notes

Effective January 1, 2021 a real estate component was added to the PSG Target Risk funds benchmarks. The benchmark provider – MSCI/REALPAC Canada Quarterly Property Fund Index (Unfrozen) – has indicated that this is an “unfrozen benchmark” where rate of returns may be updated historically from time to time.

Fund objective

The objective of this Fund is to provide regular income with low volatility. This Fund invests in other Canada Life funds. Its primary focus is on fixed-income investments, but includes a small equity component to increase returns over longer time periods. Its target mix is 63% fixed income and 37% equities.

Historical performance as at March 31, 2025

This graph shows a \$10,000 investment in this fund, on March 16, 2015 would be worth \$14,969 on March 16, 2025; compared to the benchmark which would be worth \$15,107 over that time period. Investment manager

Canada Life

Investment management style

Portfolio Solutions Group builds and monitors asset allocation funds. Their objective is to maximize returns while minimizing risks. To achieve this they combine top-down modelling and bottom-up manager selection. Their top-down analysis provides insight into aggregate portfolio style drift, risk exposure and mandate gaps. Their bottom-up focus is on selecting managers who consistently add value by following a well-defined investment process.

Notes

Effective January 1, 2021 a real estate component was added to the PSG Target Risk funds benchmarks. The benchmark provider – MSCI/REALPAC Canada Quarterly Property Fund Index (Unfrozen) – has indicated that this is an “unfrozen benchmark” where rate of returns may be updated historically from time to time.

Fund objective

The objective of this Fund is to provide income while also allowing for longer-term capital appreciation. This Fund invests in other Canada Life funds. It emphasizes income, but provides an opportunity for growth, with lower volatility than the more aggressive profile funds. Its target mix is 51% fixed income and 49% equities.

Historical performance as at March 31, 2025

This graph shows a \$10,000 investment in this fund, on March 16, 2015 would be worth \$16,071 on March 16, 2025; compared to the benchmark which would be worth \$16,681 over that time period. Benchmark: 43.35% FTSE Canada Universe Bond Index, 7.65% Bloomberg Global Aggregate TR Index (CAD Hedged), 12.30% S&P/TSX Composite Index, 28.70% MSCI All Country World Index¹, 8.00% REALpac/IPD Canada Quarterly Property Fund Index

Investment manager

[Beutel, Goodman & Company Ltd.](#)

Investment management style

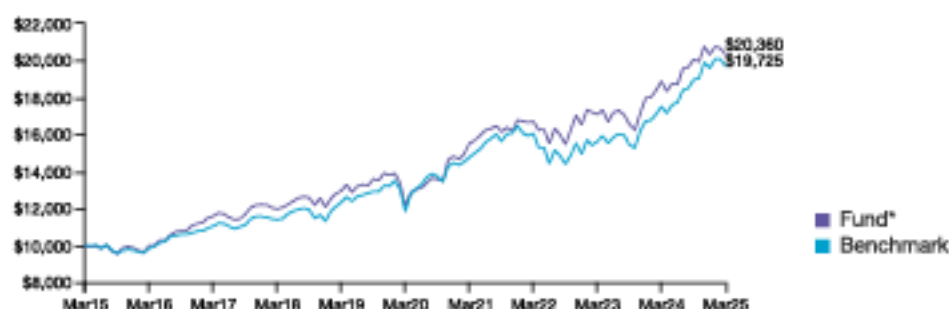

The Fund uses a bottom-up value approach investing in high quality, liquid companies that have built shareholder value over extended periods of time. The Fund targets a long-term asset mix of 60 per cent equities and 40 per cent bonds. Fund managers base the asset mix of the portfolio on the equity outlook and use the full foreign content component.

Fund objective

To maximize portfolio returns through capital appreciation and investment income. This Fund invests in Canadian and United States stocks, Canadian bonds and short-term securities.

Equity style and capitalization overview

The fund is invested in large-capitalization, value stocks on average.

Investment manager

[Mackenzie Investments](#)

Investment management style

This Fund in particular is characterized by a value oriented investment selection approach - in-depth financial analysis used to determine the intrinsic value of a company, looking for out-of-favour companies with attractive valuations - with a focus on selecting proven dividend paying investments. The result of this bottom-up stock picking is a concentration of high-quality Canadian holdings.

Fund objective

To maximize dividend income consistent with preserving capital and maintaining liquidity. This Fund invests primarily in preferred and common shares of Canadian corporations which will yield a high level of dividend income.

Historical performance as at March 31, 2025

This graph shows how a \$10,000 investment in this fund, on March 16, 2015 would be worth \$23,612 on March 16, 2025; compared to the benchmark which would be worth \$25,183 over that time period. Benchmark: 80% S&P/TSX Composite Dividend Index, 20% MSCI World Index¹

Investment manager

[TD Asset Management Inc.](#)

Investment management style

TDAM specializes in indexed, or passive, management of equities and bonds. The major advantages of indexing are consistent relative performance, diversification, minimizing manager risk and lower costs. Investment management costs (management fees, transaction costs, custody and market impact) are considerably less for indexing than for active management.

Fund objective

Track the performance of the S&P/TSX Composite Index, which is comprised of Canadian companies traded on the Toronto Stock Exchange (TSX). The Fund invests primarily in the stocks that make up the S&P/TSX Composite Index, in substantially the same proportion as the index.

Investment manager

[Phillips, Hager & North Investment Management](#)

Investment management style

The Fund seeks to utilize yield-enhancing strategies also known as "Plus" strategies by primarily investing in a wide range of Canadian and non-Canadian fixed income securities in developed and emerging markets. These securities include mortgages, debt obligations and investment and non-investment grade debt (including high yield bonds, emerging market debt, convertible bonds and derivatives).

Fund objective

To provide current income and long term capital appreciation by investing in fixed income securities primarily in Canada with some exposure to foreign securities.

Investment manager

[Mackenzie Investments](#)

Investment management style

The Mackenzie Fixed Income Team integrates qualitative and quantitative research perspectives to formulate views on interest rates, currencies, and credit risk. They augment that research with rigorous fundamental credit analysis which seeks to identify companies with stability in earnings and strong free cash flow, but which also assesses company risks and asset values designed to manage downside risk at all points during the credit cycle.

Fund objective

The Fund holds a diversified portfolio of high quality (investment grade) Canadian government and corporate bonds. The Fund objective is to track performance of the FTSE Canada Universe Bond Index.

Investment manager

[Canada Life](#)

Investment management style

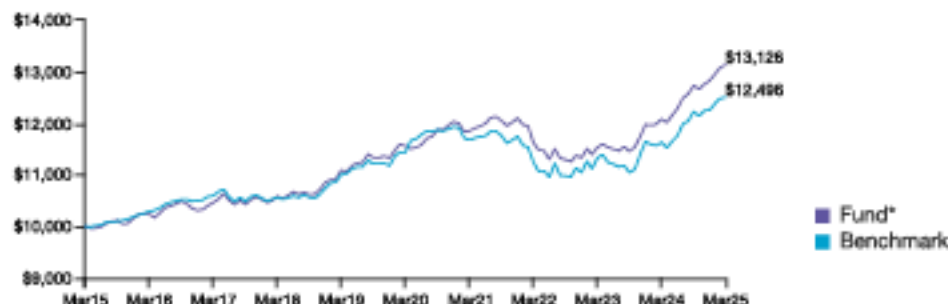

Canada Life's approach is to acquire and maintain a high quality diversified portfolio of commercial mortgages to produce, stable and predictable income with minimal default risk. Canada Life's fixed-income management style uses a consistent approach to fundamental market research and quantitative research to ensure a measured approach to portfolio construction and is disciplined to ensure risk management is always top of mind.

Fund objective

To provide a high level of income while maintaining long-term stability of capital. The Fund invests primarily in mortgages on Canadian property, diversified across regions. Emphasis is on commercial properties, but both multi-family and single-family residential mortgages may be included. A mix of office, industrial, retail, multi-family and miscellaneous properties secure the loans.

The fund has average volatility relative to the fund's asset class.

Investment manager

[TD Asset Management Inc.](#)

Investment management style

TDAM specializes in indexed, or passive, management of equities and bonds. The major advantages of indexing are consistent relative performance, diversification, minimizing manager risk and lower costs. Investment management costs (management fees, transaction costs, custody and market impact) are considerably less for indexing than for active management.

Fund objective

To track the performance of the S&P 500 Total Return Index. The Fund invests in stocks included in the Index and S&P's depository receipts, and other instruments that approximate the return of the Index. The Fund also invests in Government of Canada T-bills and other Canadian money market instruments, and options, futures, and forward contracts - based on the Index.

Historical performance as at March 31, 2025

This graph shows how a \$10,000 investment in this fund, on March 16, 2015 would be worth \$35,681 on March 16, 2025; compared to the benchmark which would be worth \$34,975 over that time period. Benchmark: 100% S&P 500 Index (Net)

Investment manager

[Mawer Investment Management Ltd.](#)

Investment management style

The Fund invests primarily in equity and equity-related securities of entities outside of Canada and the United States. The amount invested in any one country will vary depending upon individual company by company opportunities in each area. The Fund will diversify through currencies, industries, and countries to increase safety, and to increase the growth and liquidity of the investments.

The Manager systematically creates a broadly diversified portfolio of wealth-creating companies with excellent management teams bought at discounts to their intrinsic values. The Manager employs a highly disciplined, research-driven, bottom-up process and long-term holding period to allow for investor recognition or corporate growth, and to minimize transaction costs.

Fund objective

To provide long-term capital growth and geographic diversification by investing primarily in international equities.

Historical performance as at March 31, 2025

The fund has average volatility relative to the fund's asset class.

Equity style and capitalization overview

The fund is invested in large-capitalization, blend stocks on average.

Investment manager

[MFS Investment Management Canada Limited](#)

Investment management style

The Fund seeks to outperform the MSCI EAFE Index over full market cycles. The firm's strategy is to construct a well-diversified portfolio of high-conviction ideas following a growth-at-a-reasonable price style with a quality bias. This approach is based on the philosophy that stocks trading at a discount to their projected value have a greater potential for multiple expansion. The fund relies on individual stock selection as the primary source of alpha generation, which consists of high-quality, attractively valued companies identified through our global research platform. Currency hedging is permissible, but would only be implemented for defensive purposes.

Fund objective

The Fund seeks to provide long term capital gains by investing primarily in non-North American equities.
